Academy of Pediatric Physical Therapy Speaker Toolkit

This document was designed to provide information for those who present continuing education for the Academy of Pediatric Physical Therapy (APPT) through live courses, online courses, webinars, home study programs, and other presentations. In general this information applies to speakers at APTA’s NEXT Conference and Combined Sections Meeting (CSM) as well, although the online submission of proposals and acceptance is coordinated through APTA in collaboration with APPT.

Q: How are speakers chosen by the Academy of Pediatric Physical Therapy?

For some courses and continuing education formats, APPT selects the speakers based on expertise in the target area and a proven record of providing effective presentations. APPT also calls for proposals for some continuing education activities.

CSM: The process is managed by APTA, with APPT programming selected and managed by the CSM Program Chair(s) and Committee. Procedures for submissions are uniform for all CSM presenters. APPT members review proposals and the CSM Program Chair(s) and Committee plan the overall pediatric content and coordinate other activities.

NEXT (APTA’s Annual Conference) pediatric content: The process is managed by APTA, although APPT may be asked to assist APTA staff with identifying relevant topics, reviewing proposals, and serving on the program committee.

APPT Courses through APTA’s Learning Center: APPT has a non-exclusive agreement with the Learning Center to create online pediatric courses. APPT comes up with a ranked list of courses and speakers they wish to present through the Learning Center, based on feedback provided via the member survey and works with APTA and speakers to coordinate the effort.

APPT-sponsored continuing education:

- **Innovations in School-based Pediatric Physical Therapy Course**: Speakers are invited by the Innovations Course Program Committee based on feedback from course participants, member surveys, and experience and knowledge of the speakers.

- **APPT Advanced Clinical Practice (ACP) in Pediatrics Course**: Speakers are invited by the ACP Course Program Committee based on feedback from course participants, member surveys, and experience and knowledge of the speakers.

- **APPT Annual Conference (APPTAC) – formerly SoPAC**: Speakers for APPTAC are invited based on recommendations of the Academy’s Special Interest Groups (SIGs) and the APPTAC Program Committee. There is also a call for proposals for additional sessions and speakers, which is sent to APPT members around August 1 of the year before APPTAC. Members of the Education Committee and the APPTAC Program Committee review proposals and assist in planning the overall APPTAC event.

1 – updated 1/15, 7/16
Q: What is required in a speaker proposal?

For conferences and other learning activities sponsored by APTA, APTA staff and specific program committees determine the request for proposals, then review and select those to be presented. APPT members often are included in this process. Proposals are submitted online through ScholarOne with specific requirements outlined.

For APPTAC sessions, proposals are submitted using a process that is explained on the APPTAC website (www.pediatricapta.org under Professional Development).

If you have a proposal for another APPT-sponsored continuing education program, contact pediatrics@apta.org, so you can be sent a proposal submission form.

Standards for APPT Continuing Education Proposals

1. Responds to an identified need or needs of the Academy’s membership. Needs are identified through the Education Committee and program chairs for conferences such as APPTAC, Innovations, ACP, CSM, NEXT

2. Reflects the language and content of the Guide to Physical Therapist Practice and the International Classification of Functioning, Disability, and Health.

3. Provides specific outcome objectives written to reflect the appropriate levels of Bloom’s Taxonomy for the target participant audience (knowledge, comprehension, application, analysis, synthesis, evaluation). www.bloomstaxonomy.org

4. Specifically states an appropriate targeted level of participants’ baseline knowledge (beginner, intermediate, advanced, etc).
   - Basic (1) - This level assumes that participants have little information within the areas to be covered so that the focus of the activity is a general orientation and increased awareness.
   - Intermediate (2) - This level assumes that the participants have a general familiarity with the topic, so it focuses on increased understanding and application.
   - Advanced (3) - This level assumes thorough familiarity with the topic and focuses on advanced techniques, recent advances, and future directions.
   - Various (Multiple) (0) - This category indicates that a single level cannot be determined. It is intended for programs in which the instructional level may vary.

5. Explicitly identifies the instructional strategies to be used in the proposed continuing education offering, such as lecture, lab, demonstration, panel discussion, questions & answer, audience participation/networking, blended learning opportunities, follow-up.

6. Includes a planned method to promote the process of the participant’s knowledge translation.

7. Includes methods to evaluate a participant’s attainment of the specified learning outcomes.

8. Reflects the principles of evidence-based practice and includes a list of scientific references to support the content to be presented.

9. Specifically discloses any potential financial gain on the part of the presenter(s).

10. Speaker meets qualifications as effective presenter with knowledge in subject (evident through attached CV or bio)

Q: How many speakers are recommended or accepted for a conference session?

This depends on the length of the session and the format of the presentation.

2 – updated 1/15, 7/16
• Lecture: generally prefer no more than 2 speakers per session
• Panel: only recommended if purpose is to provide a brief overview from various perspectives: not to exceed 1 speaker per 15-20 minutes
• Networking sessions or roundtable discussions: depending on the size of the audience and the length of the session, 1-2 leaders and 1 facilitator per 1-2 groups or tables
• Lab/Practicums: 1-2 main speakers, 1-2 lab assistants for hands-on practice or patient demonstrations depending on size of audience

Q: How and when will I know if my proposal has been accepted?

The program committee for the specific continuing education program will notify you by letter or e-mail of acceptance or non-acceptance of your proposal. You may be asked for additional information or to make some changes to the proposal. Once your proposal has been accepted, the continuing education program committee will send you a speaker letter to outline the specific payment and reimbursement details.

Q: If selected as a speaker for the APPT, what materials and information must I submit?

The following information is required for APPT speakers:

Biography: A brief biography (one paragraph) is needed for CEU approval and may be included in the conference program materials posted online or printed.

Presentation Materials: Most speakers choose to use PowerPoint (PPT) for their presentations. Video can be embedded in the PPT presentation, accessed online if internet access is available, or accessed via flash drive, CD, etc.

Handouts: Most presenters choose to offer a handout version of their PPT for learners to reference. Please see the end of this Speaker Toolkit for specifics re: PPTs for APPT-sponsored continuing education (details for PPTs for APTA-sponsored continuing education may be different). The handouts may be posted prior to and following the conference for a specified length of time or hard copies may be provided onsite, depending on the size of the course.

Q: Will conference registrants have computer access to the handouts from the website?

Yes. Speakers are encouraged to provide a PDF of the handouts for posting.

Q: Can I use my videos in the presentation but not make it available for posting?

Videos and photos are used to illustrate key concepts. If a link for a video is available, please include. Otherwise video will most likely not be included in the posted handout.

Q: Is citing the information that I include from external sources enough? Do I need to obtain copyright permission since this information is for educational use?

All speakers/authors are required by law to provide the source of information when presenting materials or information or phrases that are not their own. A full attribution of the author(s), title,
publisher, city/state of publisher, date, pages, and URL of the original publication should always be displayed on any presentation or annotated on any document. *This does not require copyright permission unless it is an extensive amount of copy or information.*

The following is a list of speaker responsibilities for granting copyright permission to APPT:

**Attribution:** Speakers will meet their legal requirements of providing attribution for all materials, quotes, information, photos included in their presentation, as indicated above.

**Original Materials:** Speakers agree to license copyright permission to APPT for all original materials.

**Videos and Photos:** Speakers must secure appropriate permissions from the persons videotaped or photographed to allow for use in a presentation. Videos and photos may have the eyes or faces of the individuals blurred or blinded to maintain privacy. Videos and photos should not be provided if they do not meet these parameters.

**Graphs and Charts that are not original work:** Speakers must reference any graphs or charts that are not original work. If the amount of information is extensive, the information should be summarized with a reference for the participant to access the full information.

If a complaint of copyright infringement is brought to APPT leadership, APPT leadership will investigate it. If it is determined that copyright infringement has occurred, the session in question will be cancelled and no honorarium or speaker travel/per diem/complimentary conference registration will be provided.

**Q: Does this limit my ability to present or publish information on the same topic?**

Absolutely not! APTA and APPT, as professional organizations, want to further the profession by providing valuable evidence based research to our members, and is not interested in limiting intellectual property. The details of what is allowed are specifically covered in the contract you sign with APTA or APPT. If you have any questions about terms, please contact APTA’s Professional Development Department for Learning Center modules or the APPT Executive Director.

**Q: What materials are needed to evaluate the learner’s attainment of specified learning outcomes or promote knowledge translation to practice?**

The speaker may submit questions for post-conference tests or participant feedback, as well as forms that will show how the learner can apply the new knowledge and skills in practice. APPT provides opportunity for post-conference feedback through participant surveys.

**Q: What type of financial support does APPT offer speakers?**

APPT values the contributions of speakers and strives to support them through registration, travel, per diem, and honorarium. Still, it is APPT’s responsibility to be fiscally responsible to its members and balance the expenses of sponsoring continuing education programs with the value and revenue received to offset costs. Specifics may vary depending on the conference, the type of presentation, the number of speakers, and the expertise of the speaker. Details will be outlined in the speaker letter.

**Registration fees:** APPT typically waives registration fees for speakers at APPT-sponsored courses.

4 – updated 1/15, 7/16
Travel and Per Diem: APPT typically covers travel costs (including airfare, mileage at the current IRS rate, parking, taxi, baggage fees, etc) and per diem (lodging and meals), with original receipts, for the day on which speakers are speaking. Travel and per diem costs are capped, as are the number of speakers per session (typically 2).

Honorarium: Generally $100 per hour of presentation, pro-rated if more than one speaker.

Specific details for travel, per diem, and honorarium will be outlined in the speaker contract and may be negotiated with the course programming chair.

Speakers will be offered the opportunity to donate their honorarium to:

- Foundation for Physical Therapy Pediatric Fund
- APPT (undesignated)
- APPT Research Fund
- APPT other specific activity

Details on these funds can be found at www.pediatricapta.org under About Us/Donate to the Academy. Any questions may be directed to the course program chair, APPT Education Committee Chair, or the Executive Director (pediatrics@apta.org).

PowerPoint Guidelines for Effective Presentations (for APPT-sponsored Continuing Education Courses)

1. For the PowerPoint presentation that you use during your presentation, use plain backgrounds and avoid busy graphics. A blue background with yellow print is typically easy to see. A good contrast between background color and color of the print is essential. Avoid red—it often does not project well.
   a. NOTE: for the handout that you submit to be posted for attendees, there are specific requirements noted in your speaker agreement. These include:
      i. PDF format
      ii. White background with black print
      iii. 3 slides per page
      iv. No more than 25 pages total
      v. Include only material for which you have permission
2. Use a sans serif font—which does not have little lines (“serifs”) on the ends of each character. These fonts are cleaner and easier to read. Popular examples are Arial and Helvetica. Make sure to use the same font throughout the presentation.
3. Never go below a font size of 28 on any PowerPoint slide—anything smaller and it cannot be seen from back of room and is too small when handouts are printed. If your font size automatically shifts to a smaller font, then you have too many words on one slide. Better to have more slides with fewer words on each.
4. Tables and graphs—If the font size is <28, it will not be effective as a slide. Consider adding the table or graph as a separate, single page PDF that can be added to the end of your PowerPoint handout PDF. Consider putting the graph in a slide only as a visual for the “big picture” idea and to reference the full-page PDF at the end of your handout packet.
5. Use people-first language in all materials: PowerPoint slides, handouts, and verbal presentation. People-first language means that you refer to a “child with cerebral palsy” vs a “cerebral palsy child.”
6. All citations should be included on the slide on which the material appears. List up to 3 authors and year of publication. If the article has 4 or more authors, list the first author, et al, and publication year. This can be done in parentheses after the relevant bullet point, or in a text box at the bottom of the slide. A slightly smaller font is okay for citations only (ie, size 24).

7. A full AMA-style citation of each source used should be included at the end of the presentation. This can be done with the PowerPoint slides, but will take multiple slides to stay within the minimum 28-font size. If you have a long list of references, consider putting them in a separate PDF document that can be added to the end of the PowerPoint handout.

8. Avoid adding new slides after you have submitted your presentation to the program committee. Attendees are often frustrated when the handout does not match the presentation. If you absolutely must add new slides (ie, a new and relevant study was published after you submitted your handout), then clearly note in the title Academy of the slide by adding “NEW SLIDE.” This will allow attendees to stay focused on what you are saying vs searching for the slide in their handout.
